CAPACITY & CAPABILITY

SKB provides services throughout Australia, with operations in Sydney/Newcastle NSW, Melbourne VIC, Adelaide SA, Brisbane QLD, and Perth WA.

Typically, we service at 3 levels of expertise including the following responsibilities.

- Strategic Lead Planning & Controls Professional – An experienced professional with expert knowledge and technical expertise of delivering Planning and Controls services. Provides leadership role on a Major Bid and/or Project developing the strategies and framework for Planning and Program processes and systems management. Responsible for all Planning and Program matters, leading the Planning team, developing the Program and reporting to the Bid/Project Leadership team as well as interfacing with the client representative.
- Senior Planning & Controls Professional – A professional Planner competent in Planning and Program Management skills having typically +10yrs experience in industry having worked on Tender bids and/or projects. Sound expertise in using typical industry standard processes and systems in developing Planning and Program material (including Primavera P6 and others). Has capability to lead sections on a major and/or project.
- Planning/Scheduling Professional – An industry professional with skills in the development and maintenance of Planning and Program material (including Primavera P6 and others), expertise in data management skills and knowledge in the efficient development of outputs ie, excel data mining, reporting etc...

Resumes and day rates can be provided for specific roles, lengths of engagements with skills and expertise as required.
